Precision Plated Grinding Wheels for Tool and Cutter Grinders

Cuttermasters 6" Darex Replacement Wheels M3 and M5

These are very accurate wheels with more grit and better shape than the stock Darex wheels (Darex equivalent part numbers given below each wheel).

Cuttermaster CBN and Diamond Wheels last two to three times longer than the Darex plated wheels. There is virtually no dust and the wheel maintains a sharp corner producing accurate tip geometry and a good center when point splitting. CBN is best for Cobalt and High speed steel tools. Diamond wheels are recommended for the grinding of solid carbide tools

6" Diameter X 3/4" Width X 1-1/4" Arbor, with 1/4" side plating on both sides.
