

Quick Set Riser for CUTTERMASTER

CM-Riser

Height Adjustment

**Flat Grinding Flute
inside and outside
and Gash**

**(Tower-like operation
without a tower)**

Motor Riser for fluting and end gash operations. Traditional 1970s CUTTERMASTER (MG, FCG) doesn't have the height for end gash and getting inside flutes of hoppers. Riser sits under the motor and gives lots of height options.
